Innovit launches latest EANnet validation solutions

Impetus is one of Australia's leading Supply Chain events. Organised by [GS1 Australia](#) (formerly EAN Australia), this year's Impetus conference will showcase not only the GS1 system, but focus on areas such as RFID and Data Synchronisation.

Innovit, a leading provider of Product Data Management (PDM) solutions is proud to be invited by GS1 as a Gold Sponsor of Impetus 2006.

This sponsorship further endorses their Business Alliance and close working relationship that has been in place for over three years.

With the emphasis on data synchronisation at Impetus, Innovit has

chosen this as the platform to launch their latest range of iICE EANnet Validation tools.

Fully certified by GS1 Australia, the iICE Validator is a set of tools that assist suppliers and retailers to manage their EANnet product catalogues.

iICE Validator tools are the latest software solutions available to companies that need to manage, validate, and publish product catalogues to global data pools such as EANnet. As part of their official product launch, Innovit will provide the opportunity for Impetus delegates to receive a copy of the iICE Validator software.
