

Innovit's GS1net/NPC Kick-Start Programs Fast-Track Compliance for National Product Catalogue (NPC)

National Product Catalogue (NPC on GS1net) has been endorsed by all Australian State, Territory and Federal Health Departments. **NPC on GS1net** will be the 'source of item master data' for public health institutions. **NPC** data will form the basis for the on-going e-procurement processes. NSW Health is the largest state health jurisdiction is now sourcing data directly from the NPC/GS1net.

NPC Kick-Start Programs from Innovit are a way for suppliers to fast-track the process of becoming NPC Compliance. GS1net/NPC workshops held by Innovit provide healthcare companies with the crucial information, as well as the tools and project steps to "jump the queue" and implement NPC on GS1net quickly and easily.

"Recently I came across a GS1 accredited service provider called Innovit who is conducting a series of *NPC Quick Start Education Seminars* to assist suppliers in becoming NPC Ready, not only for NSW Health but for all Health jurisdictions. Positive feedback from these sessions so far has shown that they can provide significant value to an organisation's NPC readiness project." I therefore encourage you to take advantage of these types of sessions."

Valentino Bulaon: NSW Health Support Services Manager

Innovit is a leader in Master Data Management (MDM) and Product Data Management (PDM) software solutions. Innovit's iICE products are one of the few solutions certified by GS1 for GS1net/NPC. Companies such as Novartis, Wyeth, Stryker, Analytica and Welch Allyn have selected Innovit to help them meet compliance with the National Product Catalogue (NPC)

Looking for assistance to help you get started with your NPC program?

Contact Innovit on 02 8020 2000 to register for their next GS1net/NPC Kick-Start Program.

Need GS1net/NPC certified middleware to manage your NPC Catalogue? Visit www.innovit.com.au to download our **iICE Validator for GS1net/NPC software for a free 3-week trial**.
